### **Abstracts**

#### **1.- “ Distal Femoral Fractures: Treatment with Intramedullary Locking Nail”**

**The treatment of femoral fractures had a long and painful road from the Bamboo splints, tractions, body cast, early plates like Lane, Supracondylar L plates, Intramedullary rods and finally the locking nails antegrade or retrograde and the Peri articular locking Plates.**

**A retrospective study of this type of fractures treated with locking nail is presented**
